Making the Most of Your Massage

How to Prolong the Benefits of Bodywork

Barbara Hey

A massage works in wonderful ways, easing stress and pain, calming the nervous system, increasing circulation, loosening tight muscles, stimulating internal organs, and enhancing skin. The multiplicity of physiological responses sends a simple, clear message to the mind: Massage feels good. Of course, you want to hold on to that just-had-a-massage feeling -- total body relaxation, muscles relaxed and at ease, and fluid movement restored -- for as long as possible.

But how long that bliss lasts depends on the state of your body. If you're suffering from chronic pain or recovering from injury, then it may take more sessions and perhaps different

Massage Frequency

How often you receive massage depends on why you're seeking massage. In dealing with the general tension of everyday commutes, computer work, and time demands, a monthly massage may be enough to sustain you. On the other hand, if you're seeking massage for chronic pain, you may need regular treatments every week or two. Or if you're addressing an acute injury or dealing with high levels of stress, you may need more frequent sessions. Your situation will dictate the optimum time between treatments, and your practitioner will work with you to determine the best course of action.

All you can learn is what your inward life is and try to stay loyal to that.

-Joseph Campbell

The more often you receive massage, the more therapeutic it becomes.

modalities before optimal health is restored.

If massage is part of your regular health regimen, then it's more likely the effects will endure. In other words, the effects of massage are cumulative, like any healthy habit. The more often you get a massage, the greater and longer-lasting the benefits.

"You need to consider how you felt before the session and how you felt after, and then look at how long you maintain that," says Pieter Sommen, the chair of the eastern department in the Swedish Institute School of Massage Therapy in New York.

In general, experts say "regular" is preferable, but how regular depends on your situation. While daily massage would be delightful, practical considerations such as cost, time, and physical need likely determine the frequency of treatments. "It's best to maintain a schedule," says Eeris Kallil, CMT, a shiatsu instructor at the Boulder College of Massage Therapy in Colorado. "That way the body becomes conditioned and prepared for session at specific intervals."

Maintenance

Whether you get a massage weekly, monthly, or just every once in a while, the following habits can maximize and extend the afterglow of treatment.

WATER

One bit of advice you'll hear over and over again is to drink plenty of water after a massage. Bodywork -- no matter the particular modality -- releases toxins, such as lactic acid and carbonic acid, that need to be flushed from the body. Massage also promotes circulation, increasing blood flow and oxygen and stimulating the lymphatic system, which helps rid the body of pathogens. After-massage hydration supports these functions, helping to eliminate released impurities, sooner rather than later.

STRETCHING

Another helpful habit is stretching between massages to maintain joint mobility, prevent muscles from tightening up again, and keeping the life energy flowing. This may mean doing yoga or whatever specific or full-body stretches suggested by your practitioner. After a shiatsu session, for example, your practitioner may recommend "makko-ho" stretches, a series of six exercises designed to keep energy circulating. "This series of stretches take anywhere from 5 to 10 minutes a day, but really help keep the chi flowing through the body," says Kallil.

EXERCISE

Working out can also help maintain the benefits of massage, and this habit should be continually cultivated. However, if you're receiving massage therapy to help speed muscle strain recovery, you may need to ease up on the exercise for a while and give the body time to heal -- particularly if you're

recovering from a strenuous body-pummeling training regimen. "You don't want to over-work your body," says Kallil. That is, if running is taking a toll, try something more gentle and meditative such as swimming, walking, or tai chi.

BODY AWARENESS

After a massage, respect how your body feels. If your body seems to ask for rest, give in to that demand. This may mean backing off the to-do list, taking it easy, moving slower, and perhaps doing less for a while. And don't allow yourself to get fatigued because it will undermine the effects of massage. Get sufficient sleep to allow the body to absorb the effects and regain vitality.

DIET

Finally, since you've just rid the body of toxins, support the body's renewed state by adhering to a healthy diet rich in

fruits and vegetables, which will continue the detoxification process. Lay off the espresso and all adrenaline-challenges for a time -- which would short-circuit relaxation anyway -- and enjoy the calm.

The benefits of massage are many, including: increasing circulation, allowing the body to pump more oxygen and nutrients throughout the body; stimulating lymph flow and boosting immunity; relaxing overused or tight muscles; increasing joint mobility and range of motion; reducing recovery time after strenuous workouts or surgery; and relieving back pain and migraines, just to name a few.

After receiving a massage, clients feel rejuvenated, relaxed, and refreshed. By opting for a few lifestyle choices, you can extend these benefits and get the most out of your massage.

Stretching between massages helps maintain relaxed muscles, joint mobility, and energy flow.

Are Your Candles Safe?

How to Choose Toxin-free Flames

Glynnis Osher

There is nothing like the inviting glow of a candle to make us feel relaxed, guide us into a meditative state, or harmonize the ambiance of a room. With all these life-enhancing attributes, it is troubling to think that many candles are toxic and doing more harm than good--but that may be the case.

The Problem

Most candles today are made from paraffin wax, a petroleum by-product that emits toxic fumes and soot into the air. There are up to eleven known carcinogenic compounds in paraffin candles that are considered toxic air agents by the state of California. Burning these candles can cause harm to the heart, lungs, circulatory, and nervous systems, especially a concern for young children, the elderly, and those with asthma or other already established respiratory problems. In addition, the burning of the fragrant oils in scented candles can create significant air pollution, as well.

Another possible hazard: wicks. While

U.S. candle makers voluntarily agreed 25 years ago to prohibit lead wicks, some imported candles may still contain lead. Ensure you're burning cotton wicks only.

The Solution

The good news is, you can still enjoy burning candles because there are safe and healthy alternatives. Conscious candle choices include beeswax and the increasingly popular soy wax. Unlike petroleum, soy is a sustainable and renewable resource. Soy wax is a vegetable by-product that is biodegradable and nontoxic. Many candle enthusiasts prefer soy candles because they burn clean and release very little or no soot into the air. Also, because soy wax is water soluble, clean up is easy and containers can be easily washed and reused. Another benefit of soy wax is the cooler burning temperature, making for a much longer burning candle.

Candles are for relaxation, not toxification.

High Time for Tea

Discover the Healing Properties of Taking Tea

The health research is enough to make you forego the latte for strong brewed tea instead. Name your color -- black, white, green, even red -- teas are packed with disease-preventing antioxidants (more than some fruits and vegetables) and contain vitamins, minerals, and at least half the caffeine of coffee.

Fortified with free radical-fighting polyphenols, tea drinkers have a reduced risk of many different cancers, in particular stomach, colorectal, and even skin cancer. Tea drinkers also have a lower risk of heart disease, stroke, and high cholesterol. Containing anti-inflammatory and arthritis-preventing properties, tea also helps stimulate the immune system and protect the liver against toxins.

But you have to drink up. Most research points to five or so cups of brewed tea each day to reap the health benefits. Decaf tea loses some but not much of its health punch, due to extra processing.

All traditional tea -- white, green, oolong, and black -- is derived from the leaves of an evergreen tree called the *Camellia sinensis*, and all contain the health-promoting polyphenols. White tea is made from young tea leaves, dried in the sun without fermentation or processing. Green tea is dried with hot air after picking, so it retains its color but is not fermented. Oolong tea, sometimes referred to as "brown" tea, is fermented but not processed to the point of black tea. Black tea, on the other hand, is fully fermented, which

accounts for the color of the leaves and its stronger flavor.

Rooibos, or red tea, is naturally caffeine-free and from the *Aspalathus linearis*, a shrub that grows only at high altitude near Cape of Good Hope in South Africa.

Herbal teas are made from a variety of plants, roots, bark, seeds, and flowers and are technically herbal infusions rather than tea. Though they don't contain the same antioxidants and haven't received the same research-based accolades as traditional tea, the herbs in these infusions have certain healing properties that have been used for centuries to treat many common health issues.

*One cannot help
but be in awe
when he
contemplates the
mysteries of
eternity, of life,
the marvelous
structure of
reality.*

-Albert Einstein

FREE PHYSICAL ASSESSMENTS

Joe Danna is a Certified Neuromuscular Therapist trained in advanced Myofascial Mobilization with 20 years experience. More than a relaxation spa type of massage, his work is specific and gets to the root of chronic conditions, which result in decreased range-of-motion, dysfunction and pain.

Visit Atlantic Massage & Muscular Therapies, LLC injury clinic for a free evaluation. People with upper back and neck problems especially love this work!

Massage is known to enhance chiropractic applications. Below are special rates for Dr. Paul's patients.

30 minutes: \$30 (Reg. \$45)

1-Hour: \$55 (Reg. \$75)

90 Minutes: \$80 (Reg. \$100)

"I can't think of a more gratifying way to earn a living than by educating my clients and helping them to feel better".
